User testing

Step 1: The Usability Test

User Feedback: Explain here in detail

1. Dates should bring you somewhere else
2. Should be able to click on artist name or picture to take you somewhere
3. Search bar should be bigger

Proposed Changes as a result of feedback

1. Dates bring the user to a calendar with lots of options
2. Click on artist name or picture will take them to their website
3. Stretch the search bar across the page and make the location and date smaller underneath
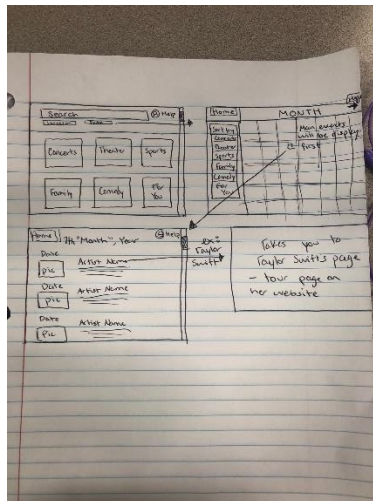

Step 2: Revision

Explanation of changes made

1. I made the search bar longer and put the location and date below (smaller as well)
2. If you click on dates, it brings you to a calendar page
3. The artist name or picture will take you to their website with their tour dates and such

Sketch before changes   Sketch with changes

Step 3: Second Usability Test

User Feedback: Explain here in detail

1. "sort by" on 2nd frame should be a drop-down menu
2. Make 3rd frame more aesthetically pleasing
3. "Is there a select all button?

Proposed Changes as a result of feedback

1. I will make a drop-down menu on the dates page
2. It will be picture, then tickets, then artist name with information
3. I will make an option to have a select all button in the drop-down menu

Step 4: Revision

Explanation of changes made

1. I included a drop-down menu on the dates page
2. I made it so it goes tickets, then the artist picture, then artist title and little information
3. I made a "select all" option on the drop-down menu
